DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of Group 1, claims 1,2,5,6,12,13,15-21, and 24 in the reply filed on 21 June 2006 is acknowledged.

This application contains claims 28-30, 32-45, 47-53, and 55 drawn to an invention nonelected without traverse on 2 June 2006. A complete reply to this action must include cancellation of nonelected claims (37 CFR 1.144) See MPEP § 821.01.

2. This application is in condition for allowance except for the following formal matters:

Specification

3. The abstract of the disclosure is objected to because:

Applicant's abstract is over 150 words, has multiple occurrences of "means" and "said", and includes the implied phrase "Accordingly the invention resides in.." as well as other implied phrases. Correction is required. See MPEP § 608.01(b).

4. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The

Art Unit: 3677

abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

5. The disclosure is objected to because of the following informalities:

On page 12, line 14, "provide" should be --provides-- and line 23 has an extra period after "trolley".

Drawings

6. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they include the following reference sign(s) not mentioned in the description: Reference number "48" is not in the specification. A proposed drawing correction, corrected drawings, or amendment to the specification to add the reference sign(s) in the description, are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Appropriate correction is required.

Claim Objections

7. Claims 2,5,15,18, and 12,17, and 21 are objected to because of the following informalities:

Claim 2 recites the limitation "the location" in line 3. There is insufficient antecedent basis for this limitation in the claim, as previous disclosures were to "the locations".

Claim 5 recites the limitation "conveyance means" in line 2. There is insufficient antecedent basis for this limitation in the claim, as previous disclosures were to "conveyance".

Claim 15 recites the limitation "said remotely controlled nozzle" in line 5. There is insufficient antecedent basis for this limitation in the claim.

Claim 18 recites the limitation "said large items" in lines 3-4. There is insufficient antecedent basis for this limitation in the claim.

Claims 12, 15, 17, and claim 21 recite the limitation "the {specific} vehicle". There is insufficient antecedent basis for this limitation in the claim, as previous disclosures were to "conveyance". This is easily corrected by changing the dependence to --claim 5--.

Claims 28-30, 32-45, 47-53, and 55 must be cancelled, as they are to the non-elected invention, which was non-elected without traverse.

Allowable Subject Matter

8. As allowable subject matter has been indicated, applicant's reply must either comply with all formal requirements or specifically traverse each requirement not complied with. See 37 CFR 1.111(b) and MPEP § 707.07(a).

9. Examiner notes that Brockett USP 3164491 in view of Sigel WO 88/07645 is considered the closest prior art, and was applied in the parent case. However, Brocket

Art Unit: 3677

in view of Sigel does not teach applying the fresh lining composition onto the lining, but clearly applies the fresh lining to the pipeline surface that was exposed by the excision. Also, the limitation that "a conveyance" comprising inspection, excising, debris removal, and application means, was introduced into the pipeline requires all 4 means - inspection, excising, debris removal, and application means - to be introduced together and "said conveyance" comprising the 4 means - inspection, excising, debris removal, and application means - entails the entire conveyance moving together at each step of inspection, excising, debris removal, and application. Examiner does not believe that "in situ" added a patentable limitation, as Brocket in view of Sigel would and could be used in situ if it were advantageous to do so.

Conclusion

10. Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
